Görme engelli bireylerin kullanmış oldukları özel Braille alfabesi ARGE birimimizin titiz çalışması sayesinde yönlendirme levhalarımızın üzerine işlenmiştir. Özel makinelerimiz tarafından alüminyum levha, akrilik ve diğer materyallerin üzerine hissedilebilir yüzeyler oluşturulur. Bu yöntem sayesinde tüm görme engellilerin yön ve adres bulmalarını kolaylaştırılmıştır. Uygulanacak metinler tek bir panele veya modüler sistemdeki çoklu panellere işlenebilir.

Düz Sistem

MODÜLER DÜZ YÖNLENDİRME SİSTEMİ HAKKINDA

Sade ve şık görüntüsünün yanında kolay değiştirilebilir olması ve aynı zamanda sıklıkla isim değişikliğine uygun yapısı sayesinde hastane ve kurumların ilk tercihidir. Özel dizayn edilen ray sistemi sayesinde kolay sökülebilir ve değişebilir. Panellerin her iki yüzü kullanıma uygundur. İster asetatlı paneller istenirse düz alüminyum paneller kullanılabilir.
